

# **Explosion-proof treatment solution for cable trays**

## Overview

---

This white paper compares the High Resistance (HR) and Hot-Dip Galvanising (HDG) solutions and highlights the new High Resistance range, ZnAl wiremesh, ZnMg metal cable trays and accessories and ZnNi screws and bolts. Let's break down what you need to know about explosion-proof requirements for cable trays in these environments, keeping it simple and clear. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. The prefabricated design consists of modules joined together with eccentric locks or tightening bands. This combination enables quick and easy installation as well as disassembly when inspection and maintenance. Why should hazardous environments have special cable trays?

An ordinary metal tray will not be sufficient in areas where there is explosive gases or high density dust.

## Explosion-proof treatment solution for cable trays
