

External cable for construction distribution box

Overview

Some of the common types of cables used on construction sites are rubber cables, which are ideal for use on construction sites because of their flexibility and durability. Creating a connection to the wider energy grid and DNO-specific cables, our range of MV cables covers copper and aluminium conductors, armoured and unarmoured, with and without additional waterblocking properties. British standard BS5467 (PVC) and BS6724 (LSZH) offer mechanical protection whilst. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. Wieland is your experienced and reliable partner for efficient, pluggable and decentralized electrical installation. Among our distribution boxes you will find the smart and practical solution for your project or business.
