

Features of the Fiber Fusion Tray

Overview

The 48-Fiber transparent fusion splice tray is ideal for fusion splicing single fiber. The see through cover and mylar insert enable easy viewing when visual fault locator (VFL) testing and verification is performed to ensure cable continuity and determine pass or failure of splicing. It is mainly used for management of cable junction box and wall mounted junction box. The splicing tray extends the function of optical fiber splicing and provides splicing position for.

Features of the Fiber Fusion Tray

Fusion Splice Tray, 12 Position, Plastic

Product Description Prevent the dreaded micro bend with this fusion fiber splice tray. Lightweight, compact, and stackable this 12 position fusion splice tray will fit our
