

Fiber Optic Communication Chart

Overview

This template showcases a professional layout for Fiber-to-the-Home and Fiber-to-the-Building setups. It visualizes the connection between a central office and various end-user locations. Fiber-optic communication is a form of optical communication for transmitting information from one place to another by sending pulses of infrared or visible light through an optical fiber. Fiber optics, which is the science of light transmission through very fine glass or plastic fibers, continues to be used in more and more applications due to its inherent advantages over copper conductors.
