

Fiber Optic Installation Quick Connector

Overview

Fiber optic fast connectors serve as live connectors, joining two continuous optical paths formed by optical fibers. To ensure the best performance, handle the optical fibers with care during the peeling process to prevent damage. The UPC ceramic jack with a "pre-scale: spherical end" should have a return loss of $\geq 40\text{dB}$, while the APC ceramic inserts (prename: bevel, 8-degree arc) should have a return loss of $\geq 55\text{dB}$. As one of Huawei's key upstream suppliers, Fibconet proudly presents our no fusion fiber optic connection solutions.
