

# **Fiber optic cable company in Palau**

## Overview

---

Established in 2016, BSCC is a state-owned public corporation that owns and manages a submarine fiber optic cable network for the Republic of Palau. BSCC lands the cable at the Ngeremlengui Cable Landing Station, known as the Capacity Access Point at Ngeremlengui (CAP-N). The PC1 cable stretches about 200km connecting Palau to a branching unit of the SEA-US cable. Palau's remote location led to a slow uptake of its information and communications technology. The 18,000 residents who reside in Palau, spread across nine islands in the main archipelago, now have dependable "always-on" service thanks to the successful implementation of a dual-satellite connection solution by Intelsat, the operator of one of the largest integrated satellite and terrestrial. The public is hereby informed that the Belau Submarine Cable Corporation (the "BSCC") is soliciting for and accepting expressions of interest (EOI) from qualified firms for the role of Project Management Unit in connection with the BSCC's construction and implementation of a submarine fiber optic.

## Fiber optic cable company in Palau
