

Fiber optic cable on the left

Overview

A spokesperson of a Ukrainian brigade operating in the Zaporizhia Oblast reported on October 29 that Russian forces began using first person view drones with fiber optic wires stretching up to 10 kilometers in length against Ukrainian forces in the Zaporizhia direction. In the early 2000's, US military research agency developed an idea for a loitering munition controlled by fiber-optic cable under the Close Combat Lethal Recon program, but it was never fielded.
