

Fiber optic cable split vertical pipe

Overview

Two-Inch split tube, often called corrugated tubing, is used for vertical cable management, typically directly into cabinets or network racks. The flexible tube is split down one side for easy installation and access to fiber optic cables. From down spouts and down elbows to vertical ducts and tubes, FiberGuide provides a vast number of ways in which you can guide your fiber-optic cabling from the overhead raceway to your equipment racks below. For enclosing fiber optics and cables, installing conduit around existing cable, or repairing sections of damaged conduit.

Fiber optic cable split vertical pipe

Simplified and Scalable Cable Management

A next-generation fiber routing solution redefines cable management by merging the best features of existing systems. It combines the flexibility of split
