

Fiber optic cable tee elbow

Overview

The Fiber Optic Elbow snaps directly onto both 1-piece and 2-piece Wire Trak surface raceways, providing a secure, professional-grade 90° turn for sensitive cable paths. It's molded from durable, flame-rated UL V0-94 compliant PVC and color-matched for a seamless finish. CommScope's FiberGuide® system has been the go-to fiber raceway choice for central offices, data centers and mobile switching centers for over 30 years. Combining cutting-edge technology with unparalleled functionality, Fibre Raceway enhances. It is fitted either at the end or a corner of a 50mm-Duct System, so that excess patch cord length can be taken up by winding it about the loop structure provided. The SmartRack® SRFC5ELBOW connects to two channel sections or other fittings in your fiber routing system to create a 90-degree turn.
