

Fiber optic coupler housing materials include

Overview

Common materials used for connector housings include metal alloys, plastic, and composite materials. Metal housings, such as aluminum or stainless steel, offer excellent strength and durability, making them suitable for harsh environments and industrial applications. Corning has a wide variety of hardware solutions to choose from to fit your cabling needs. Fiber optic connectors are used to align and join two or more fibers together to provide a means for attaching to, or decoupling from, a transmitter, receiver, or any other fiber optic equipment. Figure 1: Fiber Optic connector components from left to right; fiber feedthrough flange, stress relief tubing, ferrule and mating sleeve.
