

Fiber optic switch cannot open console

Overview

Connecting to the switch through the serial port, there is no output from the serial interface, or the output is garbled. Has anyone encounter this before?

07-11-2023 10:20 PM Hello BusinessUser, Greetings! Could you please confirm the switch model?

I have attached a link below. Status Light: An LED indicating the system's operating status, usually a dual-color (red/green) light. It flashes green during the initialization phase, remains solid green after successful initialization, and turns red when a system fault occurs. I should also note that the switch is already pre-configured and I don't know those.

Fiber optic switch cannot open console

Using the Command Line Interface

The Fabric OS command line interface (CLI), accessed via Telnet, SSH, or a serial console, provides full management capability on a Brocade switch. The Fabric OS CLI enables an administrator to monitor
