

Fiji Galvanized Cable Tray Material

Overview

They are a type of cable support system manufactured from steel sheets coated with a zinc layer through a hot-dip galvanization process. This zinc coating provides exceptional protection against rust and corrosion, making it ideal for use in harsh environments. Cable Tray is simply a bridge-like structure that carries electrical and data cable throughout a project. Cable Tray is available in a wide variety of materials and finishes designed to match location, load and esthetic requirements. Since we are loaded with the right resources, we have been involved in offering our products in a comprehensive range in order to meet the requirements of the different industries.
