

Fiji OEM High-Speed Optical Connectivity SFP

Overview

The SFP+ passive cable assembly is an upgraded version of small pluggable (SFP) interconnections up to 10Gbps. The system complies with the SFF (SFF-8431 and SFF-8432) specifications and supports 8G Fibre Channel, 10G Ethernet, InfiniBand™ standard and Ethernet Fibre Channel. OEM SFP modules are small form-factor pluggable (SFP) optical transceivers that are manufactured by original optical component suppliers but sold under the branding and part numbers of major networking equipment vendors such as Cisco, Arista, or Juniper. We design and install high-performance fiber-optic solutions for offices, commercial buildings, data rooms, and multi-floor environments that need fast, stable, and future-ready connectivity. Two of the most common terms you will encounter in any data center or wiring closet are SFP and SFP+. These small yet flexible devices help keep networks running smoothly, especially as.
