Fully Automatic Cable Tray Processing and Customization

Overview

This comprehensive guide provides a detailed overview of cable tray making machine technology, working principles, types of machines available, manufacturing process, raw materials required, applications where used, cost considerations, tips for choosing suppliers . Fully Automatic Cable Tray Roll Forming Machine is designed to produce perforated cable tray product, which is used to protect and support for the wire electricity, electric power, communication control and instrumentation cable. It forms the sheet into specific shapes and specifications through decoiling, leveling, punching, notching, and roll forming. Built with robust engineering, it integrates continuous rolling and online punching to deliver a seamless, one-stop manufacturing.

Fully Automatic Cable Tray Processing and Customization

High Speed Automatic Cable Tray Production Line

The high-speed automatic cable tray production line is composed of an uncoiler, a leveling machine, a rotating laser cutting machine, a press brake
