

Functions of a 4-port 8-core terminal box

Overview

The wall mount 8 port fiber distribution box is designed to realize the connection between optical cable and pigtail or splitter in FTTH network systems. It offers the functions of mechanical/fusion splicing, splitting, termination and cable distribution. By combining high capacity, flexibility, durability, and security features, the 8 core fiber optic terminal box proves to be an excellent choice for IT professionals and network engineers seeking a reliable solution for their network connectivity needs. It is equipped with a cable strengthening core fixing frame, and a protective grounding wire is installed on the outer sheath seat of the fixed optical cable. The box with "Lock" infrastructure, box of body switching of simple, convenient, with a. As a global leading professional Huawei network hardware and solution provider, we have delivered Huawei, ZTE, Nokia, CISCO, Fiberhome, etc, equipment to 500+ customer groups in 90+ countries over the past 15 years. Know more Strict 3-Level Quality Control procedure: 1st-Level inspection; 2nd-Level. , Ltd, a professional manufacturer in optical telecommunication and network cabling with over 19 years experience, is a technology-driven enterprise that integrates R&D, production and sales.
