

# **Gigabit Aggregation Switch with Monitoring**

## Overview

---

Equipped with all-fiber ports, Aggregation Series Switches deliver up to 25 Gbps. With features such as Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management, they offer a robust and reliable solution for the aggregation layer of SMB. The GWN7830 Series of Layer 3 Aggregation Network Switches offers 3 model options, with up to 24 SFP ports and 12 SFP+ ports, which are ideal for medium-to-large businesses and enterprises that require high-performance networks with maximum capacity and control. The DIN Rail Industrial Network Switch is a rugged, space-saving Ethernet switch designed for reliable operation in harsh industrial environments. For this reason, we've delivered a data center-influenced standalone OLT architecture paired with non-blocking leaf-spine fabric and aggregation switching.

## Gigabit Aggregation Switch with Monitoring

---

### What is "link aggregation" and how does it benefit your

Using Link Aggregation it is simple to have these multiple Ethernet connections to act as one logical connection, hardening the network in case a
