

Gigabit Ethernet Port Access Switch

Overview

Offers 8-port, 16-port, 24-port, 48-port access and all ports support line-rate forward. H3C S5000V5 series switch supports IRF2 technology that connects multiple physical devices (up to 9) to a logical device, that is to say, users can manage and use these devices as a single device. IRF can bring the following benefits to the user:

- Simplify the management: Any one of the ports can be connected to any of the devices to login to a unified management console.
- Support IP Source Guard, which can prevent illegal IP/MAC address spoof and DOS attack.
- Supports flexible queue scheduling algorithms, including SP (Strict Priority), WRR (Weighted Round Robin) and SP+WRR.

Gigabit Ethernet Port Access Switch

48-Port-Gigabit-Ethernet-PoE+-Switch (380 W) ohne Management

24 PoE+-Ports mit bis zu 30 W pro Port und einem gesamten Leistungsbudget von 380 W für Wireless-Access-Points, IP-Kameras, IP-Telefone und vieles mehr. Dynamisches PoE maximiert die Nutzung
