

Greek Adjustable Attenuator

Overview

between different resistances forms adjustable stepped attenuators and continuously adjustable ones using.

Greek Adjustable Attenuator

Audio Technica AT8202 -- Studiocare

Audio Technica AT8202 The Audio-Technica AT8202 Adjustable In-line Attenuator is designed to prevent balanced low-impedance microphones from overloading electronics having low- to mid

Attenuator (electronics)

Overview Construction and usage Attenuator circuits Attenuator characteristics RF attenuators Audio attenuators Component values for resistive pads and attenuators

Attenuators are usually passive devices made from simple voltage divider networks. Switching between different resistances forms adjustable stepped attenuators and continuously adjustable ones using potentiometers. For higher frequencies precisely matched low voltage standing wave ratio (VSWR) resistance networks are used. Fixed attenuators in circuits are used to lower voltage, dissipate power, and to improve impedance matching
