

Gtl distribution box

Overview

The GTL series distribution box is a power distribution device that integrates modular design, high protection rating, and flexible installation, suitable for various scenarios such as residences, commercial places, and industrial workshops. It is perfectly adapted to the three installation methods - GTL trunking, flush-mounting box, and extension. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 - wherever passive distribution boxes are required.
