

Gyfty optical cable strength

Overview

GYFTY Non-armored Stranded Loose Tube Cable features FRP as the central member, ensuring the resistance to electromagnetic interference. The water-blocking material between a single polyethylene (PE) jacket and the loose tube. Direct buried cable can be buried directly into the ground in a trench or using a vibratory plow. Aerial Cables are for outside installation on poles where consideration must be given to continual tension from the cable weight as well as wind and ice loads.
