

H3C Switch Control Optical Module

Overview

H3C LSCM2CGP24TSSC8 integrates switching & routing engines with 24 SFP ports, 4 SFP+ interfaces, and 4GB flash. The following uses the Moduletek QSFP-40G-LR4 module connected to an H3C S6820 switch as an example to introduce how to read information of the connected optical module on an H3C switch. Optical transmission features low loss and is fit for long distance transmission. Such modules usually have the following characteristics: More powerful functions: In addition to providing ports, they may also take on core tasks. H3C S5120-SI series switches are widely used in the access layer Gigabit Ethernet switches, with a flexible Gigabit access and intelligent resilience architecture features is seen as the ideal of Gigabit access select. As a mainstream switch, in response to the market and customer's needs, yitianshun introduced this switch for.
