H3C aggregation switch connected to Sangfor firewall

Overview

In the dynamic link aggregation mode, each local member port and its peer member port have the same Selected state through exchanging LACPDU.

H3C aggregation switch connected to Sangfor firewall

Support

Users are required to access the external network through a Layer 2 switch and firewall, with the firewall acting as the gateway for the users. In this example, an S12500R switch acts as the Layer 2 switch.
