

Overview

Handholes are shallow chambers constructed inground to access telecom cables/components with your hands. This practice describes the basic guidelines for the proper sizing of handholes for use with fiber optic cable. They provide optimal protection for your cables and connections and are available in. The universal handhole H3 - a smart and safe cable and tube storage solution The handhole H3 offers a unique clamping system to easily fixate various diameters of ducts without the need of special installation tools.
