

High-density constant temperature cabinet NEMA4X in stock

Overview

The High-Temperature NEMA 4X (IP66) Cabinet Cooler System is an efficient solution for cooling and purging electronic control panels in challenging environments. With a capacity of 2000 Btu/hr, this system is designed to withstand ambient temperatures of 125° to 200°F. The wear, corrosion and oxidation resistance of stainless steel assures long life and maintenance free operation.

High-density constant temperature cabinet NEMA4X in stock

Exair® #174; ATEX NEMA 4X Cabinet Cooler System,

Stainless Steel continuous operation ATEX Cabinet Cooler Systems are engineered and approved for use upon purged electrical enclosures found within classified
