

High-specification finished cable trays

Overview

These trays, meeting sector-specific needs with a robust structure, feature a covered design, interlocking splicing options, and wire tray structures to facilitate high cable density. In addition to sheet metal material, demands for stainless steel material are also met. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Stago cable trays combine strength, flexibility and installation efficiency in one complete system. Whether specifying a major new project, refurbishing existing facilities or doing the engineering, procurement and construction (EPC) for your end user, with T&B Cabletray, ABB offers reliable solutions du g conforming to ASTM A123 & ISO 1461 : m. A cable tray system is a complete cable routing framework—tray sections plus the fittings, supports, and accessories required to build continuous runs across a facility. To specify the right cable tray system, confirm these key project inputs before takeoff: Match the cable tray system to the.
