# Home Fiber Optic Cable Relocation

## Overview

---

Fibre optic cable relocation involves moving existing fibre optic installations to a new location. This process demands careful planning to maintain service continuity and optimal performance. Depending on your needs, would an ethernet cable not cover it?

to move a master socket if you have ADSL or FTTC is £130, to move an ONT if you have FTTP is around £98, it's the fee Openreach charge all providers for relocating. The Premitel Fibre Termination Point Relocation Kit enables your FTTP ONT (optical network termination) to be moved to a more convenient location in your home or office. Modern home networking often relies on a Fiber-to-the-Home (FTTH) connection, which typically terminates at a service provider's external box. The existing cable is running across the front of my house but I want it moving up the house and through the loft, how do I book this?

VM will be reluctant to run through the loft unless there is a full stairs access and a boarded floor.
