Honduras Electronics Technology Fiber Optic Communication

Overview

Honduras is among the poorest countries in Central America and has long been plagued by an unstable political framework which has rendered telecom sector reform difficult; this has created real difficulties for telcos as well as consumers; fixed-line teledensity, at only 4. Honduras has developed a National Digital Agenda highlighting the country's digital transformation priorities. Fiber-optic communication is a form of optical communication for transmitting information from one place to another by sending pulses of infrared or visible light through an optical fiber. Key Insight: Honduras has seen significant growth in fiber optic infrastructure, reaching 45% coverage by 2026.
