

How long should the tailpipe be

Overview

While there is no one-size-fits-all answer to this question, a common rule of thumb is to have the exhaust tips stick out 1-2 inches from the rear bumper. When exhaust tips are too short, it can cause backpressure, which can lead to reduced engine efficiency and power output. Longer tailpipes tend to produce lower-frequency sounds (deeper tone), while shorter tailpipes result in. If you're upgrading your exhaust system or building one from scratch, choosing the right exhaust pipe size is crucial. Play it safe — as soon as you suspect that your tailpipe, or any other part of your exhaust system, is not working properly, get it checked out immediately. And if you must drive it there, lower all the windows to prevent any accumulation of.
