

How many days does it take to complete fiber optic cable laying

Overview

In summary, the estimated time for fiber optic installation is typically 7 to 15 business days from the date of purchase. This timeframe may vary depending on various factors, such as location, existing infrastructure, and the complexity of the installation. Below, we'll explore in detail the factors that influence this timeframe and what you can expect during the process. This is because the fibre cable needs to be laid over a longer distance, which can be.
