How many optical ports does the S3600 switch have

Overview

Front Panel Front Panel The S3600-2P-OLT provides two 1000 M Ethernet ports (10/100/1000Base-TX), two 1000 M SFP ports (100Base-FX/1000Base-X), two OLT ports (1000Base-PX SFP), and one console port on the front panel. When an S3600 series EPON OLT switch works as an OLT device in an EPON system, the EPON system has three port types: OLT, ONU, and UNI, as shown in Figure 1-5. The switches provide flexible full 1G access, cost-effective 10G uplink ports and a buted gateway deployment. By encapsulating layer 2 packets in UDP tunnel packets, a large layer 2 network that is the same as a VLAN can be provided to achieve greater scalability and. H3C S3600-52P-EI/SI 48 ports 100M+4 gigabit optical ports Layer 3 managed switch On sale. Designed for maximum flexibility and scalability, H3C S3600-EI series switch models come with 24 or 48 10/100 ports, plus four active SFP-based Gigabit Ethernet ports for stacking and uplinks and a 24 port 100BASE-FX switch with 2 Gigabit SFP slots.
