

How much does a European micro-module data center cost

Overview

5 million per megawatt, whereas in Europe, it is around £14 million. Additionally, the type of facility, construction timelines, and the complexity of electrical systems can significantly impact overall expenses. A Micro Modular data center is a self-contained, pre-built IT solution that packs everything you need—servers, power backup, cooling, security, and monitoring—into a compact, plug-and-play unit. The cost to build a data centre in the UK is typically between £100,000 and £1 million for small to mid-sized facilities used by NHS Trusts, universities, and SMEs. 3% during the forecast period 2025 - 2035 The Europe modular data-center market is experiencing robust growth driven by. As a general rule, it costs between \$600 to \$1,100 per gross square foot or \$7 million to \$12 million per megawatt of commissioned IT load to build a data center.
