

How much does a fiber optic KVM architecture cost in Mauritania

Overview

These networks are constructed both underground and through aerial fiber, at an average cost of \$1,000 to \$1,250 per residential household passed or \$60,000 to \$80,000 per mile. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations. The West Africa Regional Communications Infrastructure Program (WARCIP) Project helped to increase the geographical reach of broadband networks and reduce the costs of communications services in Mauritania. The deployment of approximately 1,700 kilometers (km) of fiber optic cable enabled.
