

How much does a managed PoE industrial switch cost

Overview

The typical cost of an industrial PoE ethernet switch can range from \$100 to over \$5,000, depending on factors like port count, speed, PoE capabilities, environmental requirements, and advanced network management features. Scale smarter with managed switches featuring PoE, multi-gig speeds, SFP uplinks, and seamless cloud or on-site control. --- 8 to 24 Port Industrial Switches: These medium-sized switches generally cost more due to the increased number of ports. UniFi switches deliver 10/25/100G uplinks for high-speed backbone connectivity, ensuring ultra-low latency and maximum throughput between aggregation switches, servers, and high-performance workstations.
