

How much does it cost to fuse one pigtail box

Overview

In the UK, the average cost of replacing a fuse box for a modern consumer unit is £100-£400 plus £120-£320 for an Electrical Installation Condition (EIC) Report. These amounts vary depending on the number of circuits involved and whether the inspection finds issues. Traditional fuse boxes are no longer installed as they don't meet modern safety regulations, so your existing fuse box will need to be replaced with a new device called a consumer unit. Fuse box replacement costs usually range from \$400 to \$2,000, but most homeowners will pay around \$1,100, which includes the cost of parts and labor. Homeowners typically pay between \$1,500 and \$3,500 to replace a fuse box, with most projects landing in the \$2,000 to \$3,000 range.
