

# **How much does it cost to install an outdoor server rack**

## Overview

---

Building a server rack typically costs between \$5,000 and \$50,000+ depending on hardware specifications, scalability needs, and redundancy requirements. Filter by location, rack size, pricing, bandwidth, power, and DDoS protection to find the perfect colocation plan for your servers. Some companies may change their pricing or plan offerings over time, so data may not be 100% accurate. If you're installing networking or IT gear outdoors—like cellular backhaul, public Wi-Fi hubs, traffic control systems, or remote surveillance servers—you need a rack that survives rain, dust, UV exposure, and temperature swings. The reason is simple: a rack server is not a single item but a small-scale system including hardware. Rack Size and Type Full Rack (42U or 45U): This is the standard size rack most commonly rented. From ₹20,000 for a basic open-frame rack to over ₹2 lakhs for a fully enclosed, cooled, shock-proof, and fire-resistant enclosure—the variation is massive.
