

How to Choose Steel Channel Cable Trays

Overview

Key Factors to Consider When Choosing the Best Cable Tray The best cable tray must match your cables' sizes and types. (, 10 mm to 50 mm) and configurations (bundled or single) to determine tray width and depth. To ensure that your channel tray installation will meet your present and future needs, a sequence of decisions must be made. Cable tray systems are engineered support structures designed to route, support, and protect insulated electrical cables used for power distribution, control, instrumentation, and communication. Selecting cable trays can feel overwhelming, especially with so many options available.
