

How to access Fibre Channel

Overview

Anyone can access the FCIA BrightTALK or YouTube channel that contains educational webcasts from some of the top experts in the industry. To keep abreast of the upcoming webcasts, follow FCIA on LinkedIn, Facebook and Twitter or visit the FCIA web page at fibrechannel. Fibre Channel (FC) is a high-speed data transfer protocol providing in-order, lossless delivery of raw block data. This chapter includes the following sections:

- Information About Fibre Channel Interfaces, page 1-1
- Configuring Fibre Channel Interfaces, page 1-8
- Configuring Global Attributes for. It handles high performance of disk storage for applications on many corporate networks.
