

# How to add fiber optic cable to a mobile optical splitter

## Overview

---

Connect the opposite end of the cable into the single end of the fiber optic cable splitter. When employing the first-level splitting method in a residential network, optical splitters offer flexibility for indoor or outdoor installation. Indoor options encompass locations like the community's central computer room, building's weak current well, or floor wiring box. Fiber optic internet is generally installed in the following 5 steps, which we'll dive deeper into throughout the article: A technician checks your area and prepares the connection from the neighborhood fiber network. A fiber cable (drop) is run from a nearby terminal that could be either a pole or.
