

How to adjust the height of cable trays

Overview

To change the default size of cable trays in Revit: Go to Manage > MEP Settings > Electrical Settings > Cable Trays > Size. In this tutorial, I tackle a common issue faced in electrical projects: adjusting cable tray sizes in bulk. I will guide you through the process step-by-step, ensuring you can efficiently modify your cable trays. **How to Choose the Right Cable Tray Size?**

Once you understand standard dimensions and know how to calculate required tray area, the next step is making the correct engineering choice. Did your question get successfully answered?

Then click on the ACCEPT SOLUTION button. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met.

How to adjust the height of cable trays

GENERAL INFORMATION

In vertical installations, the weight of the suspended cable creates a tensile load on itself and is the factor, from a cable perspective, that limits the height of vertical installation for a tight buffer cable.
