

How to calibrate an exfofpm-300 optical power meter

Overview

This application note demystifies how EXFO's IQS-12002 Optical Calibration System can guide you through the calibration of power meters, covering issues such as traceability and technical characteristics of detectors, while explaining the procedure in detail. EXFO can help save both time and costs with an automated calibration test system that is designed for the verification of power meters, attenuators, sources and optical time-domain reflectometers (OTDRs). Introducing the FPM-300/FLS-300 Power Sources The units operate with the following power sources: AC adapter (connected to standard power outlet—indoor use only) Compatible car outlet adapter available upon request. Browse online or download Measuring instruments EXFO FPM-300 Power Meter User Manual.
