

How to check the speed of the FC interface

Overview

Use the show interface command to verify the port speed configuration for an interface. Hardware is Fibre Channel, SFP is short wave laser w/o OFC (SN) Port WWN is 22:01:00:05:30:01:9f:02 Admin port mode is F snmp traps are enabled Port mode is F, FCID is 0xeb0002 Port. How to display detailed information about a fc interface?

Above command display detailed information about FC interface port 1 in slot 1 You may also interested to know. The output varies depending on the FCP cfm mode setting and the storage system model. In Non-Synchronous Clock Mode mode, why is the FPD-Link III forward channel rate 3 Gbps in the case of an external crystal oscillator of 52Mhz?

Instead of $52 \times 80 = 4$.
