

How to connect broadband to the electrical distribution box at the entrance

Overview

Run four Cat6 cables (with RJ45 jack points) from the home distribution box to the main entertainment hub and at least two Cat6 cables to all other outlet positions. Whether you're an electrician or a DIY enthusiast, this guide will help you understand the basics of home electrical distribution. Information and resources for developers about broadband infrastructure and connectivity requirements for new homes. Different approved documents give guidance on each of the technical parts of the regulations. We will install an ETP when we come to complete the connection but if you want to install one earlier, they can be purchased from an electrical supplier from the ETP to the home distributor box.
