

How to connect the three core switches

How to connect the three core switches

L3 or L2 Link between Core Switches

A more proper design would be to put them into a data center, as the data center has its own access and distribution (sometimes called aggregation) layer switches, and the distribution

Best practices when configuring an Access switch stack to Core

Make sure the core switch is the root bridge, and enable portfast and BPDU guard on all access interfaces. Do your routing on the core switch, with an L3 transit to the firewall.
