

How to connect the two network cable ports to the fiber optic panel

Overview

The ideal structure for connecting two fiber cables is as follows: Cable A → Adapter Panel → Patch Cord → Adapter Panel → Cable B

How It Works

Fiber Adapters: Bridge the two connector types (e. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. All switches (we will use the same on the other side) have SFP ports, what kind of fiber cables do we need?

If we are probably going to have another 50 workstations and 40 phones running on the other side as well, how many fiber links do we need?

This can't all be carried over one fiber cable per.
