

How to determine the order of 6-core Ic bundled pigtails

Overview

When ordering sets of pigtails, they are supplied with the colors from 1 to 12. The steps involve the selection of connector(s), fiber count, fiber type, cable type, and length. Fiber optic pigtails are used to terminated fiber optic cables via fusion splicing or mechanical splicing as shown in the picture. Executive Summary: A fiber optic pigtail is one of the most commonly specified yet least understood components in structured cabling. Typical applications include data centers, Broadband CATV, Passive Optical Network PON, WDM or DWDM multiplexing, FTTh, and voice services in ATM and SONET.

How to determine the order of 6-core lc bundled pigtails

Fiber Optic Pigtail: What Is It and How to Classify It?

Fiber optic pigtails are available in various types: Grouped by pigtail connector type, there are LC fiber optic pigtails, SC fiber pigtails and ST fiber
