

How to directly connect a coaxial fiber optic cable

Overview

The simple answer is no, you cannot directly connect fiber optic cables to coaxial cables. However, through the use of specialized devices, you can convert the signal between the two, effectively allowing them to work together in a network. When designing or upgrading a network, understanding the differences between coaxial cable, twisted pair, and fiber optic cable—in terms of bandwidth, transmission distance, cost, and interference resistance—is essential.
