

How to identify the model number of a Huijue core switch

Overview

Run the display device command to check the switch model, whether the switch is in a cluster/stack, and LPUs (only on modular switches). I have a few serial numbers without the model number on my inventory and wanted to know how I can look up a device and get the model number. Check the MAC address table: Use the command "display mac-address" to view the MAC address table of the switch. 05-24-2016 05:35 AM Hi The core switch is usually your most powerful switch and depending on the design its the one with routing on it and connected to your firewall, there is no command which will tell you what the core switch. Do you get a headache distinguishing one switch from another or picking the one you need?

Don't worry.
