How to make a corner fiber optic cable

Overview

Just insert the fiber into tubing, submerge it in boiling water, bend it against a corner, cool it, and remove from tubing. Do not forget to try out this fiber bending technique for your next lighting project! Corning® ClearCurve® fiber solutions can be bent around corners, enabling faster and easier installation, and providing space savings and better aesthetics - all without sacrificing performance. These challenges have driven innovative cable designs, enabled by fiber developments resulting in. The video demonstrates two applications where this technique is useful: lighting up an English pub and installing. PCA Field Applications Engineer, Henry Rice answers the question: Can fiber optic cables bend around a corner?

How to make a corner fiber optic cable

Is it OK to bend a Regular Optical Fiber Cable?

One of the most common concerns amongst the installation of fiber cables is related to the possibility of bending a fiber cable or not. Worrying about
