

How to make cable trays when cables are angled

Overview

You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make one using a metal bar. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports. The first one is when you know the angle you want to create and the second is when you want to make a parallel off-set. How to calculate the size of the cut-out section (D) for a pre-determined angle set Eg. These trays are used in various industries for organizing cables that carry power, control signals, or communication lines.
