

How to replace the diode in a laser head

Overview

To get the old diode out of the housing it's in you'll need to punch it out from the lens side, press the new diode in carefully, do not break pins off. A detailed post of how to replace a laser diode and setup voltage and current on DC/DC converter. Valid for Endurance 10 watt / 10 watt Delux / 10 watt PLUS / 10 watt PRO's 10 Watt (10000 mw) "DeLux" real rated power output laser head for your 3D printer. Replacing the laser diode in an AIXIZ laser housing simple as following this video Hope you enjoy!!. This is part 1 of a full laser head rebuild that contains 8 laser modules of which are mixed into one using a knife edge array and polarizing optics.

How to replace the diode in a laser head

Diode laser head upgrade? : r/lasercutting

I have a diode 5w laser (sculpfun) and replace that laser with a 20w laser head. I just didn't want to fry the motherboard or anything and lose out on it entirely.
